In its first edition, Global Trends in Mediation was the first book to concentrate on mediation from a comparative perspective - reaching beyond the all-too-familiar Anglo-American view - and as such has enjoyed wide practical use among alternative dispute resolution (ADR) practitioners worldwide. This new edition has not only been updated throughout; it has also added two new jurisdictions (France and Quebec) and a very useful comparative table summarising the salient points from each of the fourteen jurisdictional chapters. Each jurisdictional chapter addresses critical structural and process issues in alternative dispute resolution such as the institutionalisation of mediation, mediation case law and legislation, the range and nature of disputes where mediation is utilised, court-related mediation, mediation practice standards, education, training and accreditation of mediators, the role of lawyers in mediation, online dispute resolution and future trends. All the contributors are senior dispute resolution academics or practitioners with vast knowledge and experience of dispute resolution developments in their countries and abroad.
