The unit chosen is titled "Amusement Park Rides" (refer to excerpt below) and is to be undertaken by students in Term 1 of Year 12. ... Dreamworld, within the first week of the assignment being set. All implements used

This book examines the role that natural philosophy (that is, doctrines of physics) plays in the emergence of Early Modern political thought. Robert J. Roeklein argues that the natural philosophy of Early Modernity, especially its indictment of sense perception, constitutes a major political foundation for the more concrete doctrines of political science developed by Bacon, Descartes, Hobbes, and Spinoza.

iamil.wordpress.com blog book posts on: * Who am I? I am I. The Ultimate Answer to THE Existential Reality Question * Belief in God that is Compatible with Science * Contemporary (early 21st century) God and Science Conversation In spiritual posts, mention of contemporary spiritual leaders is avoided as the attempt is to emphasize spiritual teachings/paths/philosophy/knowledge which may be viewed as universal though the Hindu way of expressing them is used. It must also be mentioned that a few posts are specific to Hinduism. The God and Science conversation posts may be helpful to scientists and technologists from any religious tradition - Hindu, Christian, Muslim, Jewish, Buddhist, Jain, Sikh, etc. - to courageously counter ridicule of their belief in God from some atheist top scientists and technologists. Excerpts Some time ago I heard some group sing, "Love is the answer; Now, what was the question?" What a Mahavaakya (Great pithy statement)! Perhaps it is at the level of the Great Upanishadic Mahavaakyas like Thath Thwam Asi (You are That). "I regard consciousness as fundamental. I regard matter as derivative from consciousness." - Max Planck "Science cannot solve the ultimate mystery of nature. And that is because, in the last analysis, we ourselves are part of nature and therefore part of the mystery that we are trying to solve." - Max Planck

His life was one peculiarity after another. He had no perception of his name, be it spoken or seen. Then came his dreams, where slipping in and out of alternate worlds was all too easy. But what of David, the boy next door? With an aptitude for tampering with reality, David exhibited abilities far beyond what any man should be capable of. As our nameless protagonist unravels the mystery behind his surreal existence, he becomes entangled in the affairs of the neighbouring world of Heart, where he is forced to face off against demons that he once held dear.

After decades fighting the horrors of the Ancient Ones, Jebediah Higgins confronts his darkest fears, facing an enemy he would least expect. Sybil Hastings, a former colleague and lover, and King Kuranos, master dreamer, join Higgins in his struggle to save both the waking and dreaming worlds from a fate worse than death.

This book analyzes recent physics plays, arguing that their enactment of concepts from the sciences they discuss alters the nature of the decisions made by the characters, changing the ethical judgements that might be cast on them. Recent physics plays regularly alter the shape of space-time itself, drawing together disparate moments, reversing the flow of time, creating apparent contradictions, and iterating scenes for multiple branches of counterfactual history. With these changes both causality and responsibility shift, variously. The roles of iconic scientists, such as Albert Einstein and Werner Heisenberg, are interrogated for their dramatic value, placing history and dramatic license in tension. Cold War strategies and the limits of espionage highlight the emphatically personal involvement of ordinary individuals. This study is vital reading for those interested in physics plays and the relationship between the sciences and the humanities.

"A hilarious tale . . . hijinks worthy of classic I Love Lucy episodes . . . too good to pass up."—USA Today Becky Bloomwood has a fabulous flat in London's trendiest neighborhood, a troupe of glamorous socialite friends, and a closet brimming with the season's must-haves. The only trouble is, she can't actually afford it—not any of it. Her job writing at Successful Saving magazine not only bores her to tears, it doesn't pay much at all. And lately Becky's been chased by dismal letters from the bank—letters with large red sums she can't bear to read. She tries cutting back. But none of her efforts succeeds. Her only consolation is to buy herself something . . . just a little something. Finally a story arises that Becky actually cares about, and her front-page article catalyzes a chain of events that will transform her life—and the lives of those around her—forever. BONUS: This edition contains an excerpt from Sophie Kinsella's Shopaholic to the Stars. Praise for Sophie Kinsella and Confessions of a Shopaholic "Kinsella's Bloomwood is plucky and funny. . . . You won't have to shop around to find a more winning protagonist."—People "If a crème brûlée could be transmogrified into a book, it would be Confessions of a Shopaholic."—The Star-Ledger "A have-your-cake-and-eat-it romp, done with brio and not a syllable of moralizing. . . . Kinsella has a light touch and puckish humor."—Kirkus Reviews
