The LDV Maxus is a light commercial van model, originally produced by LDV Limited. It was launched in the end of 2004. The model was jointly developed under the LD100 programme code by LDV and Daewoo Motor, prior to Daewoo entering receivership in November 2000, in a five year, £500 million development programme. It was intended to replace LDV's Convoy model, and Daewoo Motor Polska's Lublin II model. A narrower derivative sharing the bodysides of the swb low-roof versions was partially ...

The engine management light comes on to inform you that the engine is not working correctly and it stores a fault code in the ECU with information on what is wrong. You can only access this information via a diagnostic device. If the EDC (engine) ECU keeps on seeing a fault on the engine operation it then goes into limp mode to protect the engine from damage (low power or stops) when you cycle the ignition it can reset the ECU and the process starts again. (depending on what the fault is).

The Asian Development Bank (ADB) works with a number of developing member countris facing fragile and conflict-affected situations---circumstances that complicate economic development, and might include domestic or international conflict, ethnic tensions, vulnerability to natural disasters, or a confluence of these factors. ADB piloted the peacebuilding tool in Nepal as a conflict-sensitive approach, a key to effective and safe implementation of projects in the country's post-conflict context. The peacebuilding tool is an analytical tool for assisting project team leaders and social experts in understanding the local context, and in identifying potential risks to implementation of development projects that are linked to social conflicts, as well as in formulating mitigation measures for addressing these risks.

Any nation or corporation that wants to compete globally must take domestic restructuring seriously.

This book provides a unique historical and qualitative review of ten foreign automakers with plants in developed North America from their early beginnings to their export entry into North America. It seeks to expand the knowledge of American and Canadian policymakers pursuing a new foreign motor vehicle assembly plant or Foreign Direct Investment.

This compelling novel follows four women as they learn to balance children, estranged husbands, boyfriends, and problems at work through their faith in God. Michelle, Tonya, Mrs. Judson, and Miz Ida, African-American, white, rich, poor -- they seemingly have nothing in common. Yet every day they face the complex realities of twenty-first-century urban life as they try to balance their needs with their belief in God. Through the course of a year, these women must come to terms with the past, discover their true identities, and recognize the unexpected miracles that reveal God's all-encompassing love. These four women entertain us and invite us to join in their lives. As they welcome us, they also introduce us to the men in their lives. The men play supporting roles, adding color and zest to the lives of the Cover Girls. Bishop Jakes knows the struggles real women encounter and the losses that make it difficult to face the future. He brings compassionate insight and deep wisdom to this novel and proves that he is not only a gifted preacher, but a born storyteller.

This updated edition in paperback of the bestselling and critically acclaimed book on the rise of Google and the 'search industry' contains a major new Afterword from John Battelle. The rise of Google is one of the most amazing stories of our time. Google's enormous impact straddles the worlds of technology, marketing, finance, media, culture, dating, job hunting, and just about every other sphere of human interest. And no one is better qualified to explain this entire phenomenon than John Battelle, the acclaimed Silicon Valley journalist who co-founded "Wired" and founded "The Industry Standard". Much more than just a business book, this explains how the search industry is changing the way we live in profound and unpredictable ways. "The Search" contains exclusive interviews with some of the biggest names at the top companies including Google founders Larry Page and Sergey Brin. Google is the No. 1 search engine and is now a recognised word in its own right - they receive over 200 million search requests every day and it is estimated that over 80 per cent of webusers turn to Google first.
