Based on real-life experiences and written by expert authors, the books in the Maintenance and Upgrades series from Crowood will help owners develop the workshop skills needed for the maintenance and repair of their cars, and give guidance on possibilities for improvements and upgrades to performance. With step-by-step instructions and safety information throughout, this book is a valuable technical resource for owners of the Land Rover Discovery, Series 1 and 2. Illustrated with over 300 photographs, the book covers sourcing parts and tools; common problems and solutions, covering all engine types, including Rover V8 and diesel engines; service and repair; improvements for wheels and tyres and detailed specifications. This valuable technical guide for owners of the Land Rover Discovery, Series 1 and 2 will be of particular interest to home and professional mechanics and Land Rover enthusiasts, specialists and owners' clubs. Illustrated with over 300 colour photographs.

Explaining Creativity is an accessible introduction to the latest scientific research on creativity. In the last 50 yearss, psychologists, anthropologists, and sociologists have increasingly studied creativity, and we now know more about creativity that at any point in history. Explaining Creativity considers not only arts like painting and writing, but also science, stage performance, and business innovation. Until about a decade ago, creativity researchers tended to focus on highly valued activities like fine art painting and Nobel prize winning science. Sawyer brings this research up to date by including movies, music videos, cartoons, videogames, hypertext fiction, and computer technology. For example, this is the first book on creativity to include studies of performance and improvisation. Sawyer draws on the latest research findings to show the importance of collaboration and context in all of these creative activities. Today's science of creativity is interdisciplinary; in addition to psychological studies of creativity, Explaining Creativity includes research by anthropologists on creativity in non-Western cultures, and research by sociologists about the situations, contexts, and networks of creative activity. Explaining Creativity brings these approaches together within the sociocultural approach to creativity pioneered by Howard Becker, Mihaly Csikszentmihalyi and Howard Gardner. The sociocultural approach moves beyond the individual to consider the social and cultural contexts of creativity, emphasizing the role of collaboration and context in the creative process.

Our general prosperity is in danger. The world economy faces severe problems, and environmental and climate crises make them worse. The "Green Economy" offers a new model, based primarily on large-scale technological solutions. It's a vision of phasing out fossil fuels in an economy assumed to become greener via technology and efficiency, and it's a comfortable, optimistic vision. This book puts the Green Economy to the test, discusses its promises, describing actual consequences and analyzing its blind spots.

This revised, expanded best-seller is a powerful new tool kit for the 21st century.

From the factory to the road, browse through more than 170 cool cars--from hatchbacks to hybrids--in DK's Pocket Genius: Cars. Trace the history of the automobile from early vintage cars to modern concept cars, limousines to coupes, and minivans to sports cars in this reference guide perfect for children ages 8-12. Catalog entries include facts provided at-a-glance information, while locator icons offer immediately recognizable references to aid navigation and understanding, and fact files round off the ebook with fun facts such as record breakers and timelines. Each mini-encyclopedia is filled with facts on subjects ranging from animals to history, cars to dogs, and Earth to space and combines a child-friendly layout with engaging photography and bite-size chunks of text that will encourage and inform even the most reluctant readers.

In her first illustrated book for children, the Pulitzer Prize–winning author Toni Morrison introduces three feisty children who show grown-ups what it really means to be a kid.

A reference for engineering designers involved in the complex process of materials selection. It covers the properties and design applications for engineered materials which include the non-metallics (such as plastics and ceramics) and composites. Each of these classes of materials has a wide range

Alex Rogo is a harried plant manager working ever more desperately to try and improve performance. His factory is rapidly heading for disaster. So is his marriage. He has ninety days to save his plant - or it will be closed by corporate HQ, with hundreds of job losses. It takes a chance meeting with a colleague from student days - Jonah - to help him break out of conventional ways of thinking to see what needs to be done. Described by Fortune as a 'guru to industry' and by Businessweek as a 'genius', Eliyahu M. Goldratt was an internationally recognized leader in the development of new business management concepts and systems. This 20th anniversary edition includes a series of detailed case study interviews by David Whitford, Editor at Large, Fortune Small Business, which explore how organizations around the world have been transformed by Eli Goldratt's ideas. The story of Alex's fight to save his plant contains a serious message for all managers in industry and explains the ideas which underline the Theory of Constraints (TOC) developed by Eli Goldratt. Written in a fast-paced thriller style, The Goal is the gripping novel which is transforming management thinking throughout the Western world. It is a book to recommend to your friends in industry - even to your bosses - but not to your competitors!
