PC-DMIS mirrors the CAD drawing in the specified axis and displays the image in the Graphic Display window. Mirrored Elements in CAD Assemblies . If you open the CAD Assembly dialog box, you can see that your original imported image name has the number 1 appended to its name. Any CAD transformation that creates a new instance of the same CAD file (such as a mirror operation) is then incremented to have a unique number.

CAD based - PC-DMIS Vision seamlessly integrates CAD into vision measurement supporting a wide range of standard CAD formats and standards including IGES, STEP, DMIS and more. It also links to a range of proprietary CAD systems like CATIA and UG using either Direct CAD Translators (DCTs), which provide a translation from native CAD or Direct CAD Interfaces (DCIs), which work directly on the CAD model.
